Subject: Soitec - Groundwater

Good Morning All!

I wanted to let you know I still am waiting on receiving the groundwater investigation reports for Soitec – Jacumba and Soitec – Pine Valley. As of Friday, Trey Driscoll from Dudek thought he would have the reports to me by today. I left him a message again this morning to get an update. He does not plan on submitting the Groundwater Monitoring and Mitigation Plans for both Pine Valley and Jacumba as he first wants to submit these to Jacumba Community Services District and Pine Valley Mutual Water Company for their comments since they are the ones that will be responsible for implementing the plans. Trey thought this would be an iterative process with these agencies. In other words, it is highly unlikely we will have these two Groundwater Monitoring and Mitigation Plans in time for the public review start date of 1/2/2014.

With a finish line date of this Wednesday, I will need to drop other work that is already running late in which to accomplish my review. I also actually need all the studies to review to even begin to say I can meet Wednesday's deadline. This means that Rosemary's Mountain 1st iteration review letter and the Enniss Sand Mine 4th Iteration Review Update letter which are both late will be going late a few extra days.

Thanks,

Jim Bennett, P.G. #7707, CHG#854
